

FALUN

serpentino

Serpentino Soapstone is the most efficient natural material to absorb and hold heat. The Falun Serpentino is part of the highly successful Falun family. The heater has excellent natural convection as well as 200kg of thermal mass that assists ember retention and radiates warmth slowly over many hours. The fresh air intake makes the Serpentino ideal for 6+ star rated buildings, while the high density of the soapstone will also work well in less efficient homes.

National Certificate of Compliance No; H1001/0916

Heating capacity	240sqm
Efficiency	Aus 73% / Eu 82%
Emissions	1.3g
Wood usage	1.8kg/hr
Weight	200 kg
H/W/D	1034/628/386
Soapstone heat bank	Fitted 100kg
Ember retention	7 hr+
